svijet metraže

POTREBNO NAM JE

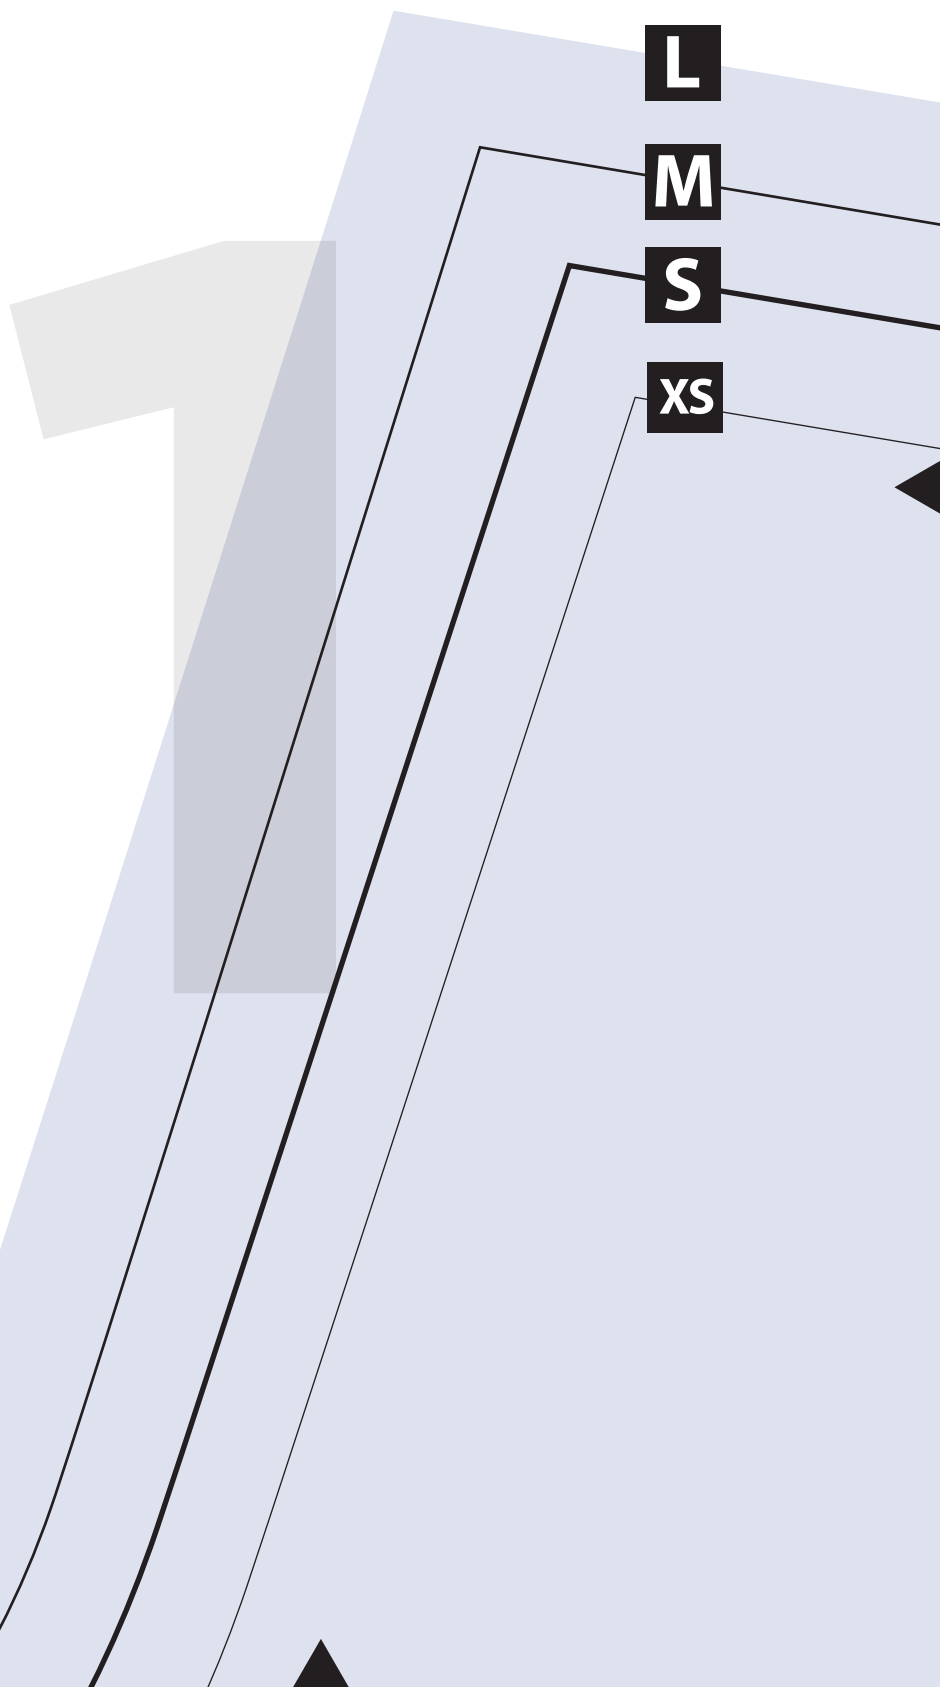

1 m poliamidnog jerseyja u jednoj boji
0,6 m poliamidnog jerseyja u drugoj boji
0,3 m poliamidnog jerseyja u boji kože
0,3 m elastične mrežice
0,65–0,85 m elastike širine 40–50 mm

PRIPREMA KROJA

Kroj isprintajte na 100%. Najprije isprintajte prednji dio kroja (str. 3) i izmjerite testni kvadrat koji mora mjeriti 5x5 cm. Isprintanim listovima odrežite donji i lijevi rub. Listove složite tako da se crni trokutići međusobno preklapaju. Zalijepite ih sa selotejpom ili ljepilom. Dodaci za šavove nisu uračunati. Preporučujemo 5 mm za sve rubove i šavove. Izrežite kraj i uz pomoć njega izrežite krojne dijelove. Video s uputama za šivanje možete pronaći na [našem Youtube kanalu](#).
